Wake Forest, North Carolina

Hi, my name is Ever Rojas.

With over a decade of experience as a software developer and a passion for leveraging cutting-edge technology to deliver innovative solutions, I am thrilled about the opportunity to bring my skills and creativity to your team.

It's not just about ideas; I'm about making ideas happen. My blend of creative vision and technological prowess sets me apart. My work has reached the homes of people through the giant IKEA, and my projects have spread across the Caribbean with Cervecería Presidente.

Whether it's a cozy living room in Sweden or a vibrant beach bar in the Dominican Republic, my software solutions are making waves.

In addition to my technical skills, I am continually seeking ways to grow and learn. I am currently diving deeper into artificial intelligence and machine learning, and I am always eager to share my knowledge and insights with others. Whether it's mentoring junior developers, presenting at tech meetups, or just geeking out over the latest AI trends, I love engaging with the tech community and contributing to our collective growth.

Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and enthusiasm can be an asset to your team.

Ever Rojas
